Ladies and gentlemen,

The future is coming. The Education 2030 Agenda has set an ambitious goal for us and the road is just under our feet. Are we ready?

As we all know, school is the foundation for education. ASPnet, one of the biggest networks of schools under the auspicious of UN advocating peace learning, sustainable development and global citizenship, should act as a pioneer for teaching and learning transforming and innovation.

I believe that your enthusiasm and devotion at this Conference will be the motivator of development of the ASPnet schools in your home country. I also believe that we are not working alone. We are a network. We have support form each other. China is willing to make continuous efforts with UNESCO and all of you to promote the “laboratory” function of ASPnet and enlarge its influence nation wide and even world wide.

Let us keep communicating and exchanging after this Conference. Let us make a brighter future for ASPnet and school education together.

Now, I would like to announce the close of the International Conference of UNESCO Associated Schools Network and wish you a nice trip back home.

Thank you.
